

Mastering Deep Neck Lift & Facelift

Advanced Surgical Training

Who We Are

Facial aesthetic surgery practice

High surgical volume

International training experience

Hundreds of facial rejuvenation procedures

Small-group surgical education

Why Our Course Is Different

Real Patients

Every Step Explained

Live Demonstrative Surgery

Decision Making

Complication Prevention

Why Our Course Is Different

Real Patients

Our training is conducted exclusively on real patients, providing exposure to authentic anatomy, individualized surgical planning, and the challenges encountered in which case.

This approach allows participants to gain practical experience that cannot be replicated in cadaveric or simulation-based training.

Why Our Course Is Different

Every Step Explained

The course begins with a comprehensive theoretical session, where every step of the procedure is explained using surgical videos, clinical images, anatomical illustrations, and detailed technical discussion.

This is followed by a live demonstrative surgery, during which participants remain beside the operating table, observing the entire procedure in real time while each surgical maneuver and decision is thoroughly explained.

Why Our Course Is Different

Live Demonstrative Surgery

Participants observe the entire procedure directly beside the operating table, following every step of the operation in real time. From patient marking to wound closure, each maneuver is demonstrated and explained as it is performed, allowing participants to fully understand the surgical technique, anatomical landmarks, and the rationale behind every decision.

Why Our Course Is Different

Decision Making

Facial rejuvenation surgery requires individualized decision-making rather than a standardized approach. Throughout the course, participants learn how to evaluate anatomical variations, determine the appropriate surgical indications, modify the operative strategy when necessary, and make sound intraoperative decisions that lead to more predictable and natural outcomes.

Why Our Course Is Different

Complication Prevention

One of the greatest values of the course is learning how to prevent complications before they happen. Participants gain practical strategies to avoid the most common intraoperative and postoperative challenges through detailed anatomical understanding, refined surgical technique, meticulous tissue handling, preservation of vital structures, and comprehensive postoperative care. This approach leads to safer procedures, greater surgical confidence, and more predictable long-term results.

COURSE CONTENT

Diagnosis

Patient selection, facial and cervical anatomy, case classification, and comprehensive preoperative assessment are covered in detail. Participants will learn how to identify ideal candidates, establish accurate surgical indications, and develop a safe, individualized treatment plan.

Execution

The complete surgical technique will be covered, including associated procedures, step-by-step instructional videos, live demonstrative surgery, and hands-on training with a model patient, in addition to updates on advanced techniques to optimize aesthetic outcomes.

Safety

The course focuses on postoperative care, discussion of clinical cases, continuous support after the course, and the management of potential complications, ensuring that participants are able to perform the technique safely and responsibly.

DIFFERENTIATORS

PRIVATE WHATSAPP GROUP

Join an exclusive group of carefully selected surgeons where you can discuss real clinical cases, ask questions, exchange experiences, and continue learning long after the course has ended.

DIFFERENTIATORS

EXCLUSIVE EDUCATIONAL MATERIALS

Comprehensive, well-structured educational content designed to be practical, easy to reference, and directly applicable to your daily clinical and surgical practice. You'll also receive a curated collection of key scientific articles and landmark references to deepen your understanding and support evidence-based decision-making.

DIFFERENTIATORS

ONLINE SUPPORT

Your learning doesn't end when the course does. We provide ongoing online support through an open communication channel where you can ask questions, discuss cases, and receive guidance, giving you greater confidence and security as you apply the techniques in your own practice.

DIFFERENTIATORS

EXCLUSIVE LIST OF SURGICAL INSTRUMENT SUPPLIERS USED IN THE COURSE

We provide a complete list of the surgical instruments and materials required to perform the techniques taught in the course. Participants may purchase the items individually from our recommended suppliers or, if preferred, we can source and assemble the entire surgical instrument set for them, ensuring they receive a complete, course-ready kit that meets all of our specifications

DR. FERNANDO ANTONINI

- Specialist in Oral and Maxillofacial Surgery (UFPR)
- M.Sc. and Ph.D. in Oral and Maxillofacial Surgery (PUCRS)
- Fellowship, Nayak Plastic Surgery – St. Louis, USA
- Fellowship, Morrisette Facial Surgery – Ventura, USA
- Fellowship, Beverly Hills Center – Beverly Hills, USA

DRA. KARINE ANSCHAU

- Specialist in Oral and Maxillofacial Surgery (UPF)
- Fellowship in Aesthetic Facial Surgery – FACE Clinic

An aerial photograph of Balneário Camburiú, Brazil. The image is split vertically. The left half shows a vibrant scene with a large white Ferris wheel on a lush green hill overlooking a turquoise beach and ocean. The right half is a darker, more muted view of the same coastline, showing the dense urban skyline of Camburiú and the beach area. The text 'BALNEÁRIO CAMBURIÚ' is overlaid in large white letters on the right side.

**CHOOSE THE
TRAINING THAT
FITS YOUR
GOALS....**

Option 1	Option 2
Facelift + Deep Neck Lift	Deep Neck Lift
Complete facial rejuvenation training	Focused training on neck rejuvenation
Face and neck procedures	Deep Neck Lift techniques only
Advanced facelift + neck surgery	Comprehensive cervical anatomy and surgical approach
Live surgeries with real patients	Live surgeries with real patients
Hands-on surgical participation	Hands-on surgical participation
Ideal for surgeons seeking full facial rejuvenation expertise	Ideal for surgeons who want to master neck surgery before advancing to facelift

OPTION 1

FACELIFT + DEEP NECK LIFT

- The most comprehensive training in facial rejuvenation surgery.
- Designed for surgeons who want to master both facial and cervical rejuvenation through real surgical experience.

OPTION 2

DEEP NECK LIFT

- An intensive program dedicated exclusively to Deep Neck Lift.
- Perfect for surgeons who want to develop confidence and expertise in cervical rejuvenation before progressing to full facelift procedures.
